DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claim Objections

Claims 1, 8, and 15 are objected to because “the unchanged modules” lacks antecedent basis.

Claims 6-7, 13-14, and 20-21 are objected to because “the components” lacks antecedent basis.

Correction is required.

Reasons for Allowance

Claims 1-21 would be allowable because the prior art does not teach or suggest a method/system/program codes for designing a programmable logic device in the manner as recited in the claims; the method/system/program codes comprising the steps/means for: receiving a modification to a programmable logic device that has been floor planned; identifying modules of the programmable logic device that have been changed by the modification; floorplanning only the changed modules thereby determining a placement solution that does not violate boundaries of the unchanged modules; and placing and routing the programmable logic device.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter
